

Jeffrey C. Davis
DTE
Fermi 2 Power Plant
6400 North Dixie Highway
Newport, Michigan, 48166

Jeff Davis is DTE's business operations expert with responsibility for nuclear generation-related regulatory initiatives before the Michigan Public Service Commission (MPSC). Jeff has been employed by DTE since 2008. Prior to his current position, Jeff has held various leadership and analyst roles with responsibility for developing the strategic financial plan and goals for DTE's Nuclear Generation organization.

Jeff graduated from the University of Michigan with bachelor's degrees in nuclear engineering and radiological sciences (NERS) and engineering physics and has also earned a master's degree and doctorate in NERS from the University of Michigan.

Jeff has served as the EUCG Nuclear Committee chairperson since 2020; Jeff's strategic focus for the EUCG Nuclear Committee is to foster member engagement throughout the year to accelerate business improvement opportunities within member organizations. Jeff has been DTE's primary representative to EUCG for the Fermi 2 Power Plant and a member of the EUCG Nuclear Committee's leadership team since 2016. Jeff has sponsored Nuclear Committee task teams for outage cost reporting and nuclear decommissioning cost reporting. Jeff believes EUCG provides incalculable value to the nuclear industry's commitment to excellence through world-class cost and staffing data and the facility to network and resolve industry business operations issues.
